atkinson and housley have produced a book that is a very competent interesting and useful addition to other work in the field its distinctive contribution for me lies in the exploration of the relationship between and developments within interactionist sociologies sociology what is symbolic interactionism this refreshing and authoritative book provides readers with a guide to the essential thinking research and concepts in interactionism a demonstration of the use of the interactionist approach an

explanation of why the interactionist influence has not been fully acknowledged in Britain the authors argue that few sociologists in Britain have identified themselves with symbolic interactionism even though many have engaged with interactionist ideas in their research and methodological work we are all interactionists now in the sense that many of the key ideas of interactionism have become part of the mainstream of sociological thought currently fashionable approaches to sociology display a kind of collective amnesia a good deal of today's ideas that are presented as novel or innovative only appear so because earlier contributions interactionism among them are not explicitly acknowledged

the papers in this volume were presented at the third conference of the European Society for the Study of Symbolic Interaction (ESSI) the theme of the 2012 conference was conflict cooperation and transformation in everyday life this volume focuses on interactions of conflict and cooperation

the first book in the series provides the concept of a theoretical redefinition of horizontal geographies these denote the spatial syntheses as undertaken in various disciplines whether as regional studies area studies new regional geography and many more the basis of the redescription is philosophical neopragmatism which has occasionally been taken up in the spatial sciences but has never been differentiated into a theory driven empirical research program this development of the research program guides the present book philosophical neopragmatism especially as conceptualized by Richard Rorty focuses in particular on contingency of society self and language which also allows spatial syntheses to be understood not as images of reality but as contingent proposals for redescribing spaces as a result of the complexity of spatial processes their horizontal geographic study requires a triangulation of theories methods researcher perspectives data and the involvement of people without expert special knowledge to highlight the contingency of the spatial syntheses the presentation of the results here especially graphic and cartographic resorts to the attitude of irony regarding the six levels of triangulation neopragmatism acts as a meta theoretical orientation framework against the background of the complexity of spatial developments on the one hand and to operationalize Rorty's principle of private self creation and public solidarity on the other hand Ralf Dahrendorf's concept of life chances is drawn upon especially in the differentiation of this concept made in this book it serves on the one hand for an understanding access of the also spatial expression of options and ligatures and on the other hand it offers a normative framework for the evaluation of socio spatial developments the reference to neopragmatic studies on spatial syntheses conducted to date and evaluated in this book shows the potential of the approach elaborated here in conceptual
